TABLE OF CONTENTS

§ 1: Preface	3
§ 2: Basis in ministerial orders	3
§ 3: Campus	3
§ 4: Faculty affiliation	3
§ 5: Study board affiliation	3
§ 6: Affiliation to corps of external examiners	3
§ 7: Admission requirements	3
§ 8: The programme title in Danish and English	3
§ 9: Programme specifications in ECTS credits	3
§ 10: Rules concerning credit transfer (merit), including the possibility for choice of modules that are part of another programme at a university in Denmark or abroad	3
§ 11: Exemptions	4
§ 12: Rules for examinations	4
§ 13: Rules concerning written work, including the Master's Thesis	4
§ 14: Requirements regarding the reading of texts in a foreign language	4
§ 15: Competence profile on the diploma	4
§ 16: Competence profile of the programme	4
§ 17: Structure and Contents of the programme	5
§ 18: Overview of the programme	5
§ 19: Additional information	7
§ 20: Commencement and transitional rules	7
§ 21: Amendments to the curriculum and regulations	7

§ 1: PREFACE

Pursuant to Act 261 of March 18, 2015 on Universities (the University Act) with subsequent changes, the following curriculum is established. The programme also follows the Joint Programme Regulations and the Examination Policies and Procedures for The Faculty.

§ 2: BASIS IN MINISTERIAL ORDERS

The Master's programme is organised in accordance with the Ministry of Higher Education and Science's Ministerial Order no. 1328 of November 15, 2016 on Bachelor's and Master's Programmes at Universities (the Ministerial Order of the Study Programmes) with subsequent changes and Ministerial Order no. 1062 of June 30, 2016 on University Examinations (the Examination Order). Further reference is made to Ministerial Order no. 111 of January 30, 2017 (the Admission Order) and Ministerial Order no. 114 of February 13, 2015 (the Grading Scale Order) with subsequent changes.

§ 3: CAMPUS

The programme is offered in Aalborg.

§ 4: FACULTY AFFILIATION

The Master's programme falls under The Faculty of Engineering and Science, Aalborg University.

§ 5: STUDY BOARD AFFILIATION

The Master's programme falls under Study Board of Mathematical Sciences

§ 6: AFFILIATION TO CORPS OF EXTERNAL EXAMINERS

The Master's programme is associated with the external examiners corps on Nationwide engineering examiners/Electronics, IT and Energy (Electromagnetic direction).

The Body of External Examiners for Mathematics can also be used.

(Ingeniørernes landsdækkende censorkorps (elektronik-delen). Censorkorpset for matematik kan også anvendes.)

§ 7: ADMISSION REQUIREMENTS

Applicants with a legal right of admission (retskrav)

- Bachelor of Science (BSc) in Engineering (Mathematical Engineering), Aalborg University

Applicants without legal right of admission

- Bachelor of Science (BSc) in Engineering (Mathematical Engineering), Technical University of Denmark (DTU)

§ 8: THE PROGRAMME TITLE IN DANISH AND ENGLISH

The Master's programme entitles the graduate to the Danish designation Civilingeniør, cand.polyt. i matematik-teknologi. The English designation is: Master of Science (MSc) in Engineering (Mathematical Engineering).

§ 9: PROGRAMME SPECIFICATIONS IN ECTS CREDITS

The Master's programme is a 2-year, research-based, full-time study programme. The programme is set to 120 ECTS credits.

§ 10: RULES CONCERNING CREDIT TRANSFER (MERIT), INCLUDING THE POSSIBILITY FOR CHOICE OF MODULES THAT ARE PART OF ANOTHER PROGRAMME AT A UNIVERSITY IN DENMARK OR ABROAD

The Study Board can approve successfully completed (passed) programme elements from other Master's programmes in lieu of programme elements in this programme (credit transfer). The Study Board can also approve successfully

completed (passed) programme elements from another Danish programme or a programme outside of Denmark at the same level in lieu of programme elements within this curriculum. Decisions on credit transfer are made by the Study Board based on an academic assessment. See the Joint Programme Regulations for the rules on credit transfer.

§ 11: EXEMPTIONS

In exceptional circumstances, the Study Board can grant exemption from those parts of the curriculum that are not stipulated by law or ministerial order. Exemption regarding an examination applies to the immediate examination.

§ 12: RULES FOR EXAMINATIONS

The rules for examinations are stated in the Examination Policies and Procedures published by the faculty on their website.

§ 13: RULES CONCERNING WRITTEN WORK, INCLUDING THE MASTER'S THESIS

In the assessment of all written work, regardless of the language it is written in, weight is also given to the student's formulation and spelling ability, in addition to the academic content. Orthographic and grammatical correctness as well as stylistic proficiency are taken as a basis for the evaluation of language performance. Language performance must always be included as an independent dimension of the total evaluation. However, no examination can be assessed as 'Pass' on the basis of good language performance alone; similarly, an examination normally cannot be assessed as 'Fail' on the basis of poor language performance alone.

The Study Board can grant exemption from this in special cases (e.g., dyslexia or a native language other than Danish).

The Master's Thesis must include an English summary (or another foreign language: French, Spanish or German upon approval by the Study Board). If the project is written in English, the summary must be in Danish (The Study Board can grant exemption from this). The summary must be at least 1 page and not more than 2 pages (this is not included in any fixed minimum and maximum number of pages per student). The summary is included in the evaluation of the project as a whole.

§ 14: REQUIREMENTS REGARDING THE READING OF TEXTS IN A FOREIGN LANGUAGE

At programmes that are taught in Danish, it is assumed that the student can read academic texts in modern Danish, Norwegian, Swedish and English and use reference works, etc., in other European languages. At programmes taught in English, it is assumed that the student can read academic text and use reference works, etc., in English.

§ 15: COMPETENCE PROFILE ON THE DIPLOMA

The following competence profile will appear on the diploma:

A Candidatus graduate has the following competency profile:

A Candidatus graduate has competencies that have been acquired via a course of study that has taken place in a research environment.

A Candidatus graduate is qualified for employment on the labour market based on his or her academic discipline as well as for further research (PhD programmes). A Candidatus graduate has, compared to a Bachelor, developed his or her academic knowledge and independence so as to be able to apply scientific theory and method on an independent basis within both an academic and a professional context.

§ 16: COMPETENCE PROFILE OF THE PROGRAMME

The graduate of the Master's programme

Knowledge

- has knowledge in one or more of the areas applied mathematics, engineering science, and their interaction. The knowledge should, in selected areas, be based on the highest level of international research
- can understand and on a solid mathematical and engineering basis reflect over the area's knowledge base and be able to identify relevant mathematical and technological problems

Skills

- excels in the subject area's(s') scientific methods and tools and general skills related to employment within the subject area(s)

- can evaluate and select among the subject area's(s') scientific theories, methods, tools and general skills and, on a scientific basis, advance new analyses and solutions
- can communicate scientific knowledge and discuss professional and scientific problems with both peers and non-specialists

Competencies

- can manage work and development situations that are complex, unpredictable and require new solutions
- can independently initiate and implement discipline-specific and interdisciplinary cooperation and assume professional responsibility
- can independently take responsibility for own professional development and specialization

§ 17: STRUCTURE AND CONTENTS OF THE PROGRAMME

The programme is structured in modules and organised as a problem-based study. A module is a programme element or a group of programme elements, which aims to give students a set of professional skills within a fixed time frame specified in ECTS credits, and concluding with one or more examinations within specific exam periods. Examinations are defined in the curriculum. The programme is based on a combination of academic, problem-oriented and interdisciplinary approaches and organized based on the following work and evaluation methods that combine skills and reflection:

- lectures
- classroom instruction
- project work
- workshops
- exercises (individually and in groups)
- teacher feedback
- reflection
- portfolio work

§ 18: OVERVIEW OF THE PROGRAMME

Overview of the programme:

All modules are assessed through individual grading according to the 7-point scale or Pass/Fail. All modules are assessed by external examination (external grading) or internal examination (internal grading or by assessment by the supervisor only).

General provisions concerning courses:

- Only a limited number of elective courses will be offered at each semester
- Some mandatory courses are only offered every other year
- Students can only participate once in a course with a given title. In particular, they cannot follow a course if they have previously participated in a course with the same title as part of a bachelor programme
- Courses from a bachelor programme must include extra competencies when followed on the master programme

Offered as: 1-professional					
Study programme:					
Module name	Course type	ECT S	Applied grading scale	Evaluation method	Assessment method
1 SEMESTER					

Information Processing in Technical Systems	Project	15	7-point grading scale	Internal examination	Oral exam based on a project
Information and Coding Theory	Course	5	7-point grading scale	Internal examination	Written or oral exam
Machine Learning	Course	5	Passed/Not Passed	Internal examination	Written or oral exam
Array and Sensor Signal Processing	Course	5	Passed/Not Passed	Internal examination	Written or oral exam
2 SEMESTER					
Signal/Data Processing Systems	Project	15	7-point grading scale	External examination	Oral exam based on a project
Compressive Sensing	Course	5	Passed/Not Passed	Internal examination	Written or oral exam
MATTEK8 Elective Courses	Course	10			
3 SEMESTER					
MATTEK9 Projects	Project	30			
3-4 SEMESTER					
Long Master's Thesis, 60 ECTS	Project	60	7-point grading scale	External examination	Oral exam based on a project
4 SEMESTER					
Master's Thesis, 30 ECTS	Project	30	7-point grading scale	External examination	Oral exam based on a project

MATTEK8, 2 semester: The student follows courses equivalent to 15 ECTS. The course Compressive Sensing is mandatory.

MATTEK8 Elective Courses					
Module name	Course type	ECT S	Applied grading scale	Evaluation Method	Assessment method
Time Series and Econometrics	Course	5	7-point grading scale	Internal examination	Written or oral exam
Bayesian Inference and Mixed Models	Course	5	Passed/Not Passed	Internal examination	Written or oral exam
Spatial Statistics and Markov Chain Monte Carlo Methods	Course	5	Passed/Not Passed	Internal examination	Written or oral exam

The student selects one project, 30 ECTS, on MATTEK9.

MATTEK9 Projects					
Module name	Course type	ECT S	Applied grading scale	Evaluation Method	Assessment method
Selected Advanced Topics in Mathematics and Technology with a Focus on Mathematical Problems	Project	30	7-point grading scale	Internal examination	Oral exam based on a project
Selected Advanced Topics in Mathematics and Technology with a Focus on Technical Problems	Project	30	7-point grading scale	Internal examination	Oral exam based on a project

Study abroad

On the 3rd semester the student also has the possibility to study at another Danish or international university (study abroad). Study at another university must be approved by the Study Board.

§ 19: ADDITIONAL INFORMATION

All students who have not participated in Aalborg University's PBL introductory course during their Bachelor's degree must attend the introductory course "Problem-based Learning and Project Management". The introductory course must be approved before the student can participate in the project exam. For further information, please see the School of Engineering and Science' website.

§ 20: COMMENCEMENT AND TRANSITIONAL RULES

The curriculum is approved by the dean and enters into force as of September 2018.

Students who wish to complete their studies under the previous curriculum from 2017 must conclude their education by the summer examination period 2019 at the latest, since examinations under the previous curriculum are not offered after this time.

§ 21: AMENDMENTS TO THE CURRICULUM AND REGULATIONS
