

AALBORG UNIVERSITET

# **MASTER OF SCIENCE (MSC) IN ENGINEERING (SUSTAINABLE BIOTECHNOLOGY)**

MASTER OF SCIENCE (MSC) IN ENGINEERING  
COPENHAGEN

MODULES INCLUDED IN THE CURRICULUM

## TABLE OF CONTENTS

Advanced Microbiological Production 2018/2019 .....	3
Biorefinery Principles 2018/2019 .....	5
Systems and Synthetic Biology 2018/2019 .....	7
Biological Production Processes 2018/2019 .....	9
Biomass Conversion Processes 2018/2019 .....	11
Microbiological Discovery 2018/2019 .....	13
Advanced Kinetics and Modelling of Bioprocesses 2018/2019 .....	15
Anaerobic and Fungal Biotechnology 2018/2019 .....	17
Project Work in an External Organisation 2018/2019 .....	19
Master's Thesis in Sustainable Biotechnology 2018/2019 .....	21
Master's Thesis in Sustainable Biotechnology 2018/2019 .....	23

# ADVANCED MICROBIOLOGICAL PRODUCTION

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Demonstrate basic understanding and overview of different biological and biochemical processes that occur in microbiological fermentation and production
- Explain plant cell walls and the structure of plant material in general

#### SKILLS

- Select relevant enzymes for processing of specific biomasses
- Suggest genetic modifications of microorganisms of relevance to their project
- Write a project report following the standards of the field of study, include relevant original scientific literature, use the correct terminology, and communicate the research-based foundation, problem and results of the project in writing, graphically and orally in a coherent way
- Assess and select relevant original scientific literature and current scientific methods, models and other tools used in the project and assess the problem of the project and results in relevant scientific contexts and social conditions

#### COMPETENCES

- Handle the planning, implementation and management of complex and unpredictable research and/or developmental tasks and take professional responsibility for implementing academic assignments and interdisciplinary collaborations
- Take responsibility for own professional development and specialization

#### TYPE OF INSTRUCTION

- Project work

#### EXTENT AND EXPECTED WORKLOAD

450 hours

### EXAM

#### EXAMS

Name of exam	Advanced Microbiological Production
Type of exam	Oral exam based on a project
ECTS	15
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Avanceret mikrobiel produktion
Module code	K-BBT-K1-16
Module type	Project
Duration	1 semester
Semester	Autumn
ECTS	15
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Mette Lübeck</a>

## ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# BIOREFINERY PRINCIPLES

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Account for existing biorefinery concepts and technologies
- Compare different types of biorefineries with each other and oil refineries
- Outline possible technological couplings and combinations with other process industry

#### SKILLS

- Evaluate biomasses with respect to their applicability in biorefineries and outline which qualities that are associated with applicability
- Identify and analyze the limitations by existing physical-chemical, thermochemical, and biological methods for biomass conversion
- Set up mass and energy balances for different biomass conversions
- Apply one or more of the general calculation models for estimation of costs and energy efficiency in the conversion of different biomasses into different products

#### COMPETENCES

- Devise a suitable biorefinery technique for the conversion of a given biomass into a specific product
- Evaluate the environmental consequences of biorefinery activities

#### TYPE OF INSTRUCTION

- Lectures and theoretical exercises

#### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Biorefinery Principles
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Bioraffinaderier
Module code	K-BBT-K1-7
Module type	Course
Duration	1 semester
Semester	Autumn
ECTS	5
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Hinrich Wilhelm Uellendahl</a> , <a href="#">Carl Peter Westermann</a> , <a href="#">Mette Lübeck</a> , <a href="#">Morten Lykkegaard Christensen</a>

## ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# SYSTEMS AND SYNTHETIC BIOLOGY

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Explain and process information from “omics” technologies

#### SKILLS

- Elaborate simple metabolic models and use tools for genome-scale modelling
- Design metabolic and evolutionary engineering strategies
- Apply molecular tools for synthetic biology

#### COMPETENCES

- Evaluate and address ethical questions in the synthetic biology field

#### TYPE OF INSTRUCTION

- Lectures and theoretical exercises

#### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Systems and Synthetic Biology
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Systembiologi og syntetisk biologi
Module code	K-BBT-K1-8
Module type	Course
Duration	1 semester

## Master of Science (MSc) in Engineering (Sustainable Biotechnology)

Semester	Autumn
ECTS	5
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Cesar Simoes da Fonseca</a>

### ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# BIOLOGICAL PRODUCTION PROCESSES

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### SKILLS

Students who have passed the module should be able to

- Use basic molecular biology tools for genetic engineering
- Suggest and apply usable enzymes for biomass degradation
- Differentiate between main groups of microorganisms and their use in a production process

#### COMPETENCES

- Compare the most important types of bioreactors and suggest the optimal type for a specific production process

#### TYPE OF INSTRUCTION

- Lectures and theoretical exercises

#### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Biological Production Processes
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Biologiske produktionsprocesser
Module code	K-BBT-K1-9
Module type	Course
Duration	1 semester
Semester	Autumn
ECTS	5
Language of instruction	English

## Master of Science (MSc) in Engineering (Sustainable Biotechnology)

Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Mette Lübeck</a> , <a href="#">Peter Lübeck</a> , <a href="#">Carl Peter Westermann</a>

### ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# BIOMASS CONVERSION PROCESSES

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Explain how biomass is analyzed, characterized, treated and converted
- Explain the possibilities and techniques that are available for process control

#### SKILLS

- Select appropriate analyses for the characterization of a specific biomass considering the subsequent use in a biorefinery
- Analyze and quantify the content of relevant components and compounds in a specific biomass
- Design and perform experiments to evaluate the potential of a specific biomass in a biorefinery:
- Test and evaluate pre-treatment techniques
- Perform bench-scale fermentations
- Purify intermediate and end products
- Write a project report following the standards of the field of study, include relevant original scientific literature, use the correct terminology and communicate the research-based foundation, problem and results of the project in writing, graphically and orally in a coherent way
- Assess and select relevant original scientific literature and current scientific methods, models and other tools used in the project and assess the problem of the project and results in relevant scientific contexts and social conditions

#### COMPETENCES

- Devise the most appropriate process scheme including pre-treatment process, fermentation, purification, and down-stream processing for common types of biomass
- Handle the planning, implementation and management of complex and unpredictable research and/or developmental tasks and take professional responsibility for implementing academic assignments and interdisciplinary collaborations
- Take responsibility for own professional development and specialization

#### TYPE OF INSTRUCTION

Project work

#### EXTENT AND EXPECTED WORKLOAD

450 hours

## EXAM

### EXAMS

Name of exam	Biomass Conversion Processes
Type of exam	Oral exam based on a project
ECTS	15
Assessment	7-point grading scale

Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Processering og omsætning af biomasse
Module code	K-BBT-K2-13
Module type	Project
Duration	1 semester
Semester	Spring
ECTS	15
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Hinrich Wilhelm Uellendahl</a>

## ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# MICROBIOLOGICAL DISCOVERY

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Describe different screening strategies and their benefits and limitations
- Devise and describe relevant classical screening strategies for microorganisms with specific capabilities
- Devise and describe relevant advanced molecular screening strategies for identification of specific genes or gene products

#### TYPE OF INSTRUCTION

Lectures and theoretical exercises

#### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Microbiological Discovery
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Mikrobiel 'discovery'
Module code	K-BBT-K2-7
Module type	Course
Duration	1 semester
Semester	Spring
ECTS	5
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen

Responsible for the module	<a href="#">Mette Lübeck</a>
----------------------------	------------------------------

## ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# ADVANCED KINETICS AND MODELLING OF BIOPROCESSES

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### SKILLS

Students who have passed the module should be able to

- Estimate the kinetic parameters of a biological process and choose the key process variables for the development of a suitable process model
- Derive the mathematical model of a bioprocess
- Apply mathematical and kinetic models for different types of bioreactors
- Interpret and evaluate modelling data from bioreactors

### TYPE OF INSTRUCTION

Lectures and theoretical exercises

### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Advanced Kinetics and Modelling of Bioprocesses
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Avanceret kinetik og modellering af bioprocesser
Module code	K-BBT-K2-8
Module type	Course
Duration	1 semester
Semester	Spring
ECTS	5
Language of instruction	English

## Master of Science (MSc) in Engineering (Sustainable Biotechnology)

Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Hinrich Wilhelm Uellendahl</a>

### ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# ANAEROBIC AND FUNGAL BIOTECHNOLOGY

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Describe important groups of anaerobic bacteria, archaea, and fungi
- Describe the use of fungi in research and industry with emphasis on heterologous gene technology
- Describe the use of yeasts and filamentous fungi for different biotechnological purposes

#### SKILLS

- Compose and prepare media for the cultivation of anaerobic microorganisms
- Enrich, isolate and cultivate anaerobic microorganisms
- Suggest and apply fungal biotechnological methods
- Utilize relevant genetic technological and bioinformatic methods

#### TYPE OF INSTRUCTION

Lectures and theoretical exercises

#### EXTENT AND EXPECTED WORKLOAD

150 hours

## EXAM

### EXAMS

Name of exam	Anaerobic and Fungal Biotechnology
Type of exam	Written or oral exam
ECTS	5
Assessment	7-point grading scale
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Anaerob bioteknologi og mycobioteknologi
Module code	K-BBT-K2-9
Module type	Course
Duration	1 semester
Semester	Spring

## Master of Science (MSc) in Engineering (Sustainable Biotechnology)

ECTS	5
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Carl Peter Westermann</a> , <a href="#">Peter Lübeck</a>

### ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# PROJECT WORK IN AN EXTERNAL ORGANISATION

2018/2019

## CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

### LEARNING OBJECTIVES

#### KNOWLEDGE

Students who have passed the module should be able to

- Explain the scientific basis of the work carried out by the external organisation

#### SKILLS

- Master the scientific methods and general skills related to the project work in the external organisation
- Write a report following the standards of the field of study, use the correct terminology and document extensive use of relevant and original scientific literature, and communicate and discuss the project's foundation, problem and results in writing, graphically and verbally in a coherent way
- Critically assess and select relevant original scientific literature and current scientific methods, models and other tools used in the project and assess and discuss the problem of the project and results in relevant scientific contexts and social conditions
- Evaluate the potential of the project for further development, assessing and incorporating relevant economic, ethical, environmental and other socially relevant factors

#### COMPETENCES

- Participate in development, innovation, and research and use scientific methods to solve complex tasks
- Take professional responsibility to implement independent assignments and interdisciplinary collaborations
- Independently take responsibility for own professional development and specialization

#### TYPE OF INSTRUCTION

- Project work, supervised by an external supervisor in collaboration with an internal supervisor at Aalborg University
- Project work in an external organisation must be in areas of relevance to the competence profile of the program

#### EXTENT AND EXPECTED WORKLOAD

900 hours

## EXAM

### EXAMS

Name of exam	Project Work in an External Organisation
Type of exam	Oral exam based on a project
ECTS	30
Assessment	Passed/Not Passed
Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Projektarbejde i en ekstern organisation
Module code	K-BBT-K3-17
Module type	Project
Duration	1 semester
Semester	Autumn
ECTS	30
Language of instruction	English
Empty-place Scheme	Yes
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Mette Lübeck</a> , <a href="#">Peter Lübeck</a>

## ORGANISATION

Study Board	Study Board of Biotechnology, Chemistry and Environmental Engineering
Department	Department of Chemistry and Bioscience
Faculty	Faculty of Engineering and Science

# MASTER'S THESIS IN SUSTAINABLE BIOTECHNOLOGY

## 2018/2019

### CONTENT, PROGRESS AND PEDAGOGY OF THE MODULE

#### LEARNING OBJECTIVES

##### KNOWLEDGE

Students who have passed the module should be able to

- Explain the scientific basis and scientific issues in sustainable biotechnology
- Explain the highest international research within the thesis subject area

##### SKILLS

- Master the scientific methods and general skills related to the thesis subject area
- Write a project report following the standards of the field of study, use the correct terminology and document extensive use of relevant and original scientific literature, and communicate and discuss the project's research-based foundation, problem and results in writing, graphically and verbally in a coherent way
- Critically assess and select relevant original scientific literature and current scientific methods, models and other tools used in the project and assess and discuss the problem of the project and results in relevant scientific contexts and social conditions
- Evaluate the potential of the project for further development, assessing and incorporating relevant economic, ethical, environmental and other socially relevant factors

##### COMPETENCES

- Participate in and independently implement technological and scientific development and research, develop and implement experimental work and solve complex tasks using scientific methods
- Handle the planning, implementation and management of complex and unpredictable research and/or developmental tasks and take professional responsibility to implement independent academic assignments and interdisciplinary collaborations
- Independently take responsibility for own professional development and specialization

#### TYPE OF INSTRUCTION

Project work.

A long Master's thesis of more than 30 ECTS must include work of experimental nature to an extent that corresponds to the ECTS load of the thesis.

#### EXTENT AND EXPECTED WORKLOAD

900 hours

### EXAM

#### EXAMS

Name of exam	Master's Thesis in Sustainable Biotechnology
Type of exam	Oral exam based on a project
ECTS	30
Assessment	7-point grading scale

Type of grading	Internal examination
Criteria of assessment	As stated in the Joint Programme Regulations

## FACTS ABOUT THE MODULE

Danish title	Kandidatspeciale i bæredygtig bioteknologi
Module code	K-BBT-K4-16
Module type	Project
Duration	1 semester
Semester	Spring
ECTS	30
Language of instruction	English
Location of the lecture	Campus Copenhagen
Responsible for the module	<a href="#">Hinrich Wilhelm Uellendahl</a>
Time allocation for external examiners	D

## ORGANISATION
