TABLE OF CONTENTS

§ 1: Preface	3
§ 2: Basis in Ministerial orders	3
§ 3: Campus	3
§ 4: Faculty affiliation	3
§ 5: Study board affiliation	3
§ 6: Affiliation to corps of external examiners	3
§ 7: Admission requirements	3
§ 8: The programme title in Danish and English	3
§ 9: Programme specifications in ECTS credits	3
§ 10: Rules concerning credit transfer (merit), including the possibility for choice of modules that are part of another programme at a university in Denmark or abroad	3
§ 11: Exemptions	4
§ 12: Rules for examinations	4
§ 13: Rules concerning written work, including the Master's Thesis	4
§ 14: Requirements regarding the reading of texts in a foreign language	4
§ 15: Competence profile on the diploma	4
§ 16: Competence profile of the programme	4
§ 17: Structure and Contents of the programme	5
§ 18: Overview of the programme	5
§ 19: Additional information	8
§ 20: Commencement and transitional rules	8
§ 21: Amendments to the curriculum and regulations	8

§ 1: PREFACE

Pursuant to Act 261 of March 18, 2015 on Universities (the University Act) with subsequent changes, the following curriculum is established. The programme also follows the Joint Programme Regulations and the Examination Policies and Procedures for The Faculty.

§ 2: BASIS IN MINISTERIAL ORDERS

The Master's programme is organised in accordance with the Ministry of Higher Education and Science's Order no. 1328 of November 15, 2016 on Bachelor's and Master's Programmes at Universities (the Ministerial Order of the Study Programmes) and Ministerial Order no. 1062 of June 30, 2016 on University Examinations (the Examination Order). Further reference is made to Ministerial Order no. 111 of January 30, 2017 (the Admission Order) and Ministerial Order no. 114 of February 3, 2015 (the Grading Scale Order) with subsequent changes.

§ 3: CAMPUS

The programme is offered in Aalborg.

§ 4: FACULTY AFFILIATION

The Master's programme falls under The Technical Faculty of IT and Design, Aalborg University.

§ 5: STUDY BOARD AFFILIATION

The Master's programme falls under Study Board of Computer Science

§ 6: AFFILIATION TO CORPS OF EXTERNAL EXAMINERS

The Master's programme is associated with the external examiners corps on Computer Science

§ 7: ADMISSION REQUIREMENTS

Applicants with a legal right of admission (retskrav)

- Bachelor's degree in Information Technology with Specialisation in Technology from Aalborg University

Applicants without legal right of admission

- Students with Bachelor's degree in Computer Science or Software Engineering may, upon application to the Board of Studies, be admitted after a specific academic assessment if the applicant is deemed to have comparable educational prerequisites. The University can stipulate requirements concerning conducting additional exams prior to the start of study.

All students applying must document English language qualifications comparable to an 'English B level' in the Danish upper secondary school (minimum average grade 02).

§ 8: THE PROGRAMME TITLE IN DANISH AND ENGLISH

The Master's programme entitles the graduate to the Danish designation Cand.scient. i datalogi (it). The English designation is: Master of Science (MSc) in Computer Science (IT).

§ 9: PROGRAMME SPECIFICATIONS IN ECTS CREDITS

The Master's programme is a 2-year, research-based, full-time study programme. The programme is set to 120 ECTS credits.

§ 10: RULES CONCERNING CREDIT TRANSFER (MERIT), INCLUDING THE POSSIBILITY FOR CHOICE OF MODULES THAT ARE PART OF ANOTHER PROGRAMME AT A UNIVERSITY IN DENMARK OR ABROAD

The Study Board can approve successfully completed (passed) programme elements from other Master's programmes in lieu of programme elements in this programme (credit transfer). The Study Board can also approve successfully

completed (passed) programme elements from another Danish programme or a programme outside of Denmark at the same level in lieu of programme elements within this curriculum. Decisions on credit transfer are made by the Study Board based on an academic assessment. See the Joint Programme Regulations for the rules on credit transfer.

§ 11: EXEMPTIONS

In exceptional circumstances, the Study Board can grant exemption from those parts of the curriculum that are not stipulated by law or ministerial order. Exemption regarding an examination applies to the immediate examination.

§ 12: RULES FOR EXAMINATIONS

The rules for examinations are stated in the Examination Policies and Procedures published by the faculty on their website.

§ 13: RULES CONCERNING WRITTEN WORK, INCLUDING THE MASTER'S THESIS

In the assessment of all written work, regardless of the language it is written in, weight is also given to the student's formulation and spelling ability, in addition to the academic content. Orthographic and grammatical correctness as well as stylistic proficiency are taken as a basis for the evaluation of language performance. Language performance must always be included as an independent dimension of the total evaluation. However, no examination can be assessed as 'Pass' on the basis of good language performance alone; similarly, an examination normally cannot be assessed as 'Fail' on the basis of poor language performance alone.

The Study Board can grant exemption from this in special cases (e.g., dyslexia or a native language other than Danish).

The Master's Thesis must include an English summary (or another foreign language: French, Spanish or German upon approval by the Study Board). If the project is written in English, the summary must be in Danish (The Study Board can grant exemption from this). The summary must be at least 1 page and not more than 2 pages (this is not included in any fixed minimum and maximum number of pages per student). The summary is included in the evaluation of the project as a whole.

§ 14: REQUIREMENTS REGARDING THE READING OF TEXTS IN A FOREIGN LANGUAGE

At programmes taught in Danish, it is assumed that the student can read academic texts in modern Danish, Norwegian, Swedish and English and use reference works, etc., in other European languages. At programmes taught in English, it is assumed that the student can read academic text and use reference works, etc., in English

§ 15: COMPETENCE PROFILE ON THE DIPLOMA

The following competence profile will appear on the diploma:

A Candidatus graduate has the following competency profile:

A Candidatus graduate has competencies that have been acquired via a course of study that has taken place in a research environment.

A Candidatus graduate is qualified for employment on the labour market based on his or her academic discipline as well as for further research (PhD programmes). A Candidatus graduate has, compared to a Bachelor, developed his or her academic knowledge and independence so as to be able to apply scientific theory and method on an independent basis within both an academic and a professional context.

§ 16: COMPETENCE PROFILE OF THE PROGRAMME

The graduate of the Master's programme

Knowledge

- has knowledge in computer science that, in selected areas, is based on the highest level of international research in the subject area
- can understand and, on a scientific basis, reflect over challenges in computer science and identify solutions to scientific and engineering problems

Skills

- are proficient in scientific methods and tools and general skills related to computer science

- can evaluate and select among the theories, methods, tools and general skills and, on a sound scientific and engineering basis, advance new analyses and solutions
- can communicate research-based knowledge and discuss professional, scientific and engineering problems with both peers and non-specialists

Competencies

- can manage work and development situations that are complex, unpredictable and require new solutions
- can independently initiate and implement discipline-specific and interdisciplinary cooperation and assume professional responsibility
- can independently take responsibility for own professional development and specialization

§ 17: STRUCTURE AND CONTENTS OF THE PROGRAMME

The programme is structured in modules and organized as a problem-based study. A module is a programme element or a group of programme elements, which aims to give students a set of professional skills within a fixed time frame specified in ECTS credits, and concluding with one or more examinations within specific exam periods. Examinations are defined in the curriculum.

The programme is based on a combination of academic, problem-oriented and interdisciplinary approaches and organized based on the following work and evaluation methods that combine skills and reflection:

- lectures
- classroom instruction
- project work
- workshops
- exercises (individually and in groups)
- teacher feedback
- reflection
- portfolio work

§ 18: OVERVIEW OF THE PROGRAMME

All modules are assessed through individual grading according to the 7-point scale *or* Pass/Fail. All modules are assessed by external examination (external grading) or internal examination (internal grading or by assessment by the supervisor only)

Offered as:					
Module name	Course type	ECTS	Applied grading scale	Evaluation method	Assessment method
1 SEMESTER					
From Reality to Models	Project	15	7-point grading scale	Internal examination	Oral exam based on a project
Programming Paradigms	Course	5	7-point grading scale	External examination	Written or oral exam
Electives 1. semester					
2 SEMESTER					
From Models to Reality	Project	15	7-point grading scale	External examination	Oral exam based on a project

Software Engineering	Course	5	7-point grading scale	External examination	Written or oral exam
Electives 2. semester					
3 SEMESTER					
Pre-Specialisation in Computer Science	Project	20	7-point grading scale	External examination	Oral exam based on a project
Entrepreneurship	Course	5	Passed/Not Passed	Internal examination	Written or oral exam
Electives 3. semester					
4 SEMESTER					
Master's Thesis	Project	30	7-point grading scale	External examination	Oral exam based on a project

Electives 1. semester					
Module name	Course type	ECT S	Applied grading scale	Evaluation Method	Assessment method
Computability and Complexity	Course	5	7-point grading scale	External examination	Written or oral exam
Advanced Topics in Databases	Course	5	7-point grading scale	Internal examination	Written or oral exam
Machine Intelligence	Course	5	7-point grading scale	Internal examination	Written or oral exam
Advanced Topics in Human-Computer Interaction	Course	5	7-point grading scale	Internal examination	Written or oral exam
Data-intensive Systems	Course	5	7-point grading scale	Internal examination	Written or oral exam
Advanced Topics in Distributed Systems	Course	5	7-point grading scale	Internal examination	Written or oral exam
Real-Time Systems	Course	5	7-point grading scale	Internal examination	Written or oral exam
Web Engineering	Course	5	7-point grading scale	Internal examination	Written or oral exam
Web Intelligence	Course	5	7-point grading scale	Internal examination	Written or oral exam

Electives 2. semester					
Module name	Course type	ECT S	Applied grading scale	Evaluation Method	Assessment method
Advanced Algorithms	Course	5	7-point grading scale	Internal examination	Written or oral exam
Mobile Software Technology	Course	5	7-point grading scale	Internal examination	Written or oral exam
Advanced Programming	Course	5	7-point grading scale	Internal examination	Written or oral exam

Software Innovation	Course	5	7-point grading scale	Internal examination	Written or oral exam
Languages and Compilers	Course	5	7-point grading scale	External examination	Written or oral exam
Principles of Operation Systems and Concurrency	Course	5	7-point grading scale	External examination	Written or oral exam
Advanced Topics in Machine Intelligence	Course	5	7-point grading scale	Internal examination	Written or oral exam
Test and Verification	Course	5	7-point grading scale	Internal examination	Written or oral exam
Advanced Topics in Modeling and Verification	Course	5	7-point grading scale	Internal examination	Written or oral exam

Electives 3. semester					
Module name	Course type	ECT S	Applied grading scale	Evaluation Method	Assessment method
Specialisation Course in Database Technology	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Distributed Systems	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Human-Computer Interaction	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Semantic and Verification	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Machine Intelligence	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Systems Development	Course	5	7-point grading scale	External examination	Oral exam
Specialisation Course in Programming Technology	Course	5	7-point grading scale	External examination	Oral exam

Problem Based Learning:

A compulsory course in Problem Based Learning (PBL) is offered as an integrated part of the project module to students not acquainted with PBL at Aalborg University

Tracks

After having been accepted to the programme, students are free to choose between the elective courses at IT7. Choosing one of the tracks below, i.e. Information Technology, Machine Intelligence, Data Engineering or Embedded Systems will give the student a coherent profile in the given track. Students are required to choose tracks at IT8. In addition to the tracks listed in the scheme below, it is also possible to create other combinations after a personal consultation with the Study Board. Students with a Bachelor's degree in Information Technology will be enrolled at the IT-track.

Semester	Mandatory course All tracks	Track IT: Information Technology	Track MI: Machine Intelligence	Track DE: Data Engineering	Track ES: Embedded Systems
CS/IT7	Programming Paradigms	Computability and Complexity <i>and one of the courses</i> Advanced Topics in Databases Machine Intelligence Advanced Topics in Human-Computer Interaction	Machine Intelligence Web Intelligence	Machine Intelligence <i>and one of the courses</i> Advanced Topics in Databases Data-Intensive Systems	Advanced Topics in Distributed Systems Real Time Systems
CS/IT8	Software Engineering	Languages and Compilers <i>and one of the courses</i> Advanced Algorithms Advanced Programming Principles of Operation Systems and Concurrency	Advanced Algorithms Advanced Topics in Machine Intelligence	Advanced Algorithms Advanced Programming	Test and Verification <i>and one of the courses</i> Advanced Topics in Modelling and Verification Advanced Programming
		Project theme: From Models to Reality	Project theme: Machine Intelligence	Project theme: Data Engineering	Project theme: Embedded Systems
CS/IT9	Entrepreneurship Specialisation course (one of 7 courses)	Pre-Specialisation in Computer Science	Pre-Specialisation in Computer Science	Pre-Specialisation in Computer Science	Pre-Specialisation in Computer Science
CS/IT10		Master's Thesis	Master's Thesis	Master's Thesis	Master's Thesis

Mandatory courses in bold.

§ 19: ADDITIONAL INFORMATION

The current version of the curriculum is published on the Board of Studies' website, including more detailed information about the programme, including exams.

All students who have not participated in Aalborg University's PBL introductory course during their Bachelor's degree must attend the introductory course "Problem-based Learning and Project Management". The introductory course must be approved before the student can participate in the project exam. For further information, please see the School of Information and Communication Technology's website.

§ 20: COMMENCEMENT AND TRANSITIONAL RULES

The curriculum is approved by the Dean of The Technical Faculty of IT and Design and enters into force as of September 2017

§ 21: AMENDMENTS TO THE CURRICULUM AND REGULATIONS

Minor editorial changes have been made in connection with the digitisation of the study curriculum
