Curriculum for the Master’s Programme in Computer Science (IT), 2020
INDHOLDSFORTEGNELSE

§ 1: Preface ........................................................................................................................................... 4
§ 2: Basis in Ministerial orders ................................................................................................................. 4
§ 3: Campus ............................................................................................................................................ 4
§ 4: Faculty affiliation ............................................................................................................................... 4
§ 5: Study board affiliation ....................................................................................................................... 4
§ 6: Affiliation to corps of external examiners ......................................................................................... 4
§ 7: Admission requirements ................................................................................................................ 4
§ 8: The programme title in Danish and English ..................................................................................... 4
§ 9: Programme specifications in ECTS credits ....................................................................................... 4
§ 10: Rules concerning credit transfer (merit), including the possibility for choice of modules that are part of another programme at a university in Denmark or abroad ......................................................... 5
§ 11: Exemptions ..................................................................................................................................... 5
§ 12: Rules for examinations .................................................................................................................... 5
§ 13: Rules concerning written work, including the Master’s Thesis .................................................... 5
§ 14: Requirements regarding the reading of texts in a foreign language ............................................ 5
§ 15: Competence profile on the diploma ............................................................................................... 5
§ 16: Competence profile of the programme .......................................................................................... 5
§ 17: Structure and Contents of the programme ....................................................................................... 6
§ 18: Overview of the programme ......................................................................................................... 6
§ 19: Additional information .................................................................................................................. 8
§ 20: Commencement and transitional rules ......................................................................................... 9
§ 21: Amendments to the curriculum and regulations ............................................................................ 9
§ 1: PREFACE

Pursuant to consolidation Act 778 of August 7, 2019 on Universities (the University Act), the following is established. The programme also follows the Examination Policies and Procedures incl. the Joint Programme Regulations for Aalborg University.

§ 2: BASIS IN MINISTERIAL ORDERS

The Master’s programme is organised in accordance with the Ministry of Higher Education and Science’s Order no. 2285 of December 1, 2021 on Full-time University Programmes (the University Programme Order) and Ministerial Order no. 2271 of December 1, 2021 on University Examinations (the Examination Order). Further reference is made to Ministerial Order no. 104 of January 24, 2021 (the Admission Order) and Ministerial Order no. 114 of February 3, 2015 (the Grading Scale Order).

§ 3: CAMPUS

The programme is offered in Aalborg.

§ 4: FACULTY AFFILIATION

The Master’s programme falls under The Technical Faculty of IT and Design, Aalborg University.

§ 5: STUDY BOARD AFFILIATION

The Master’s programme falls under Study Board of Computer Science

§ 6: AFFILIATION TO CORPS OF EXTERNAL EXAMINERS

The Master’s programme is associated with the external examiners corps on Computer Science

§ 7: ADMISSION REQUIREMENTS

Applicants with a legal right of admission (retnskrav)

- Bachelor of Science (BSc) in Information Technology with Specialisation in Technology, Aalborg University

Applicants without legal right of admission

- Bachelor of Science (BSc) in Data Science, Aalborg University
- Bachelor of Science (BSc) in Interaction Design, Aalborg University
- Bachelor of Science (BSc) in Data Science, IT University in Copenhagen
- Bachelor of Science (BSc) in Data Science, Aarhus University

All applicants without a legal claim must prove that their English language qualifications is equivalent to level B (Danish level) in English

§ 8: THE PROGRAMME TITLE IN DANISH AND ENGLISH

The Master’s programme entitles the graduate to the Danish designation Cand.scient. i datalogi (it). The English designation is: Master of Science (MSc) in Computer Science (IT).

§ 9: PROGRAMME SPECIFICATIONS IN ECTS CREDITS

The Master’s programme is a 2-year, research-based, full-time study programme. The programme is set to 120 ECTS credits.
§ 10: RULES CONCERNING CREDIT TRANSFER (MERIT), INCLUDING THE POSSIBILITY FOR CHOICE OF MODULES THAT ARE PART OF ANOTHER PROGRAMME AT A UNIVERSITY IN DENMARK OR ABROAD

The Study Board can approve that passed programme elements from other educational programmes at the same level replaces programme elements within this programme (credit transfer).

Furthermore, the Study Board can, upon application, approve that parts of this programme is completed at another university or a further education institution in Denmark or abroad (pre-approval of credit transfer).

The Study Board’s decisions regarding credit transfer are based on an academic assessment.

§ 11: EXEMPTIONS

The Study Board’s possibilities to grant exemption, including exemption to further examination attempts and special examination conditions, are stated in the Examination Policies and Procedures published at this website: https://www.studieservice.aau.dk/regler-vejledninger

§ 12: RULES FOR EXAMINATIONS

The rules for examinations are stated in the Examination Policies and Procedures published at this website: https://www.studieservice.aau.dk/regler-vejledninger

§ 13: RULES CONCERNING WRITTEN WORK, INCLUDING THE MASTER’S THESIS

In the assessment of all written work, regardless of the language it is written in, weight is also given to the student’s formulation and spelling ability, in addition to the academic content. Orthographic and grammatical correctness as well as stylistic proficiency are taken as a basis for the evaluation of language performance. Language performance must always be included as an independent dimension of the total evaluation. However, no examination can be assessed as ‘Pass’ on the basis of good language performance alone; similarly, an examination normally cannot be assessed as ‘Fail’ on the basis of poor language performance alone.

The Study Board can grant exemption from this in special cases (e.g., dyslexia or a native language other than Danish).

The Master’s Thesis must include an English summary. If the project is written in English, the summary can be in Danish. The summary is included in the evaluation of the project as a whole.

§ 14: REQUIREMENTS REGARDING THE READING OF TEXTS IN A FOREIGN LANGUAGE

It is assumed that the student can read academic text and use reference works, etc., in English.

§ 15: COMPETENCE PROFILE ON THE DIPLOMA

The following competence profile will appear on the diploma:

A Candidatus graduate has the following competency profile:

A Candidatus graduate has competencies that have been acquired via a course of study that has taken place in a research environment.

A Candidatus graduate is qualified for employment on the labour market based on his or her academic discipline as well as for further research (PhD programmes). A Candidatus graduate has, compared to a Bachelor, developed his or her academic knowledge and independence so as to be able to apply scientific theory and method on an independent basis within both an academic and a professional context.

§ 16: COMPETENCE PROFILE OF THE PROGRAMME

The graduate of the Master’s programme

Knowledge

- has knowledge in computer science that, in selected areas, is based on the highest level of international research in the subject area
- can understand and, on a scientific basis, reflect over challenges in computer science and identify solutions to scientific and engineering problems
Skills

- are proficient in scientific methods and tools and general skills related to computer science
- can evaluate and select among the theories, methods, tools and general skills and, on a sound scientific and engineering basis, advance new analyses and solutions
- can communicate research-based knowledge and discuss professional, scientific and engineering problems with both peers and non-specialists

Competencies

- can manage work and development situations that are complex, unpredictable and require new solutions
- can independently initiate and implement discipline-specific and interdisciplinary cooperation and assume professional responsibility
- can independently take responsibility for own professional development and specialization

§ 17: STRUCTURE AND CONTENTS OF THE PROGRAMME

The programme is structured in modules and organized as a problem-based study. A module is a programme element or a group of programme elements, which aims to give students a set of professional skills within a fixed time frame specified in ECTS credits, and concluding with one or more examinations within specific exam periods. Examinations are defined in the curriculum.

The programme is based on a combination of academic, problem-oriented and interdisciplinary approaches and organized based on the following work and evaluation methods that combine skills and reflection:

- lectures
- classroom instruction
- project work
- workshops
- exercises (individually and in groups)
- teacher feedback
- reflection
- portfolio work

The Study Board reserves the right not to offer an elective course if less than 10 students register for the course during the registration period at a given semester. Students will be offered other options if a chosen course is not offered.

§ 18: OVERVIEW OF THE PROGRAMME

All modules are assessed through individual grading according to the 7-point scale or Pass/Fail. All modules are assessed by external examination (external grading) or internal examination (internal grading or by assessment by the supervisor only)

Options

Students have to choose between option A and option B on the 2nd Semester:

- Students with a formal computer science bachelor degree that include knowledge of programming language design and compiler construction should choose option A
- Students without a formal computer science bachelor, especially students with a degree from UCN and BAIT, should choose option B to gain knowledge of programming language design and compiler construction
- Students who are in doubt about their choice are recommended to contact the education coordinator for advice

Offered as: 1-professional

Electives 1st semester
Select 1 course
Elective courses will only be offered if enough students register for the course during the registration period. The course registration is assessed by the Study Board. Students will be offered other options if a chosen course is not offered. Elective courses are offered and created following decision by the Study Board. Thus, not all elective courses are created and offered every year.

Prior to the registration period for the 3rd semester, the study board for computer science will inform the students about which specialization courses from the curriculum will be offered in the coming semester. Likewise, new specialization courses may be added as a result of current research topics.

§ 19: ADDITIONAL INFORMATION

Further information about the programme, including exams are published on the Board of Studies’ website.

All students who have not participated in Aalborg University’s PBL introductory course during their Bachelor’s degree must attend the introductory course “Problem-based Learning and Project Management”. The introductory course must be approved before the student can participate in the project exam. For further information, please see the Department of Computer Science’s website.
§ 20: COMMENCEMENT AND TRANSITIONAL RULES

The curriculum is approved by the dean and enters into force as of September 1, 2022.

The Study Board does not offer teaching after the previous curriculum from 2020 after the summer examination 2023.

The Study Board will offer examinations after the previous curriculum, if there are students who have used examination attempts in a module without passing. The number of examination attempts follows the rules in the Examination Order.

§ 21: AMENDMENTS TO THE CURRICULUM AND REGULATIONS

On December 1st, 2022, the Vice-Dean of Education has approved the addition of the following text regarding elective courses to §18:

Elective courses will only be offered if enough students register for the course during the registration period. The course registration is assessed by the Study Board. Students will be offered other options if a chosen course is not offered. Elective courses are offered and created following decision by the Study Board. Thus, not all elective courses are created and offered every year.

The amendment is valid from autumn 2022.
