The second year consists of on-campus studies at the partner university, where studies are organised around a project with three tracks: business internship/visual project/theoretical project including hybrid/online supervision. The thesis semester includes physical courses, hybrid, and online supervision

General examination provisions

The modules hosted by Aalto University are handled according to Aalto University guidelines (see Consortium agreement between Aalto and Aalborg University)

The modules hosted by Aalborg University are handled according to the following:

Projects, theme studies etc., may be prepared in collaboration by groups of up to six students. Master's theses may be prepared in collaboration by groups of up to three students. In the examination of projects, theme studies etc., the following examination format will normally apply:

A project examination on the basis the written work, whether this was written individually or in collaboration with others. The project report/written work will be considered the shared responsibility of the group. Accordingly, students will be examined and assessed on the basis of the entire project report. One combined grade will be awarded for the project report and the oral performance. At oral group examinations, the examination must be conducted in such a way that individual assessment of each individual student's performance is ensured.

The project examination takes the form of a conversation between the examiners and the student(s) on the basis of the project report of the semester.

Where rules have been stipulated regarding the volume of written work, one page will correspond to 2400 characters, including spaces. The stipulated number of pages only includes the actual body text of the report; title page, preface, table of contents, bibliography, abstract and appendices will not be calculated. However, notes will be included in the calculation of total pages, whereas illustrations will not be calculated. Total page number must be stated on the title page.

The stipulated time intervals for oral examinations will include voting and announcement of result.

The study elements on which the individual examinations are based are rated as proportions of an annual full-time equivalent, this being calculated as the annual work of full-time student, including holidays. An annual full-time equivalent is 60 ECTS.

In order for a student to graduate from the programme, each examination must be passed with a no less than grade of 02 or a 'pass' grade. A weighted average will be calculated for the examinations assessed according to the 7-point scale, on the basis of the ECTS weight of each individual examination. So the average is defined as the sum of individual grades, each multiplied by the ECTS of the examination in question, divided by the sum of the ECTS-points of the examinations included in the average.

Examinations assessed as pass/fail will not be included in this calculation. The average grade with one decimal digit will be stated on the examination certificate.
