## TABLE OF CONTENTS

|   |    |
|---|----|
| § 1: Preface .....  | 4  |
| § 2: Basis in Ministerial orders .....  | 4  |
| § 3: Campus .....   | 4  |
| § 4: Faculty affiliation .....  | 4  |
| § 5: Study board affiliation .....  | 4  |
| § 6: Affiliation to corps of external examiners .....   | 4  |
| § 7: Admission requirements .....   | 4  |
| § 8: The programme title in Danish and English .....  | 5  |
| § 9: Programme specifications in ECTS credits .....   | 5  |
| § 10: Rules concerning credit transfer (merit), including the possibility for choice of modules that are part of another programme at a university in Denmark or abroad ..... | 5  |
| § 11: Exemptions .....  | 5  |
| § 12: Rules for examinations .....  | 5  |
| § 13: Rules concerning written work, including the Master's Thesis .....  | 5  |
| § 14: Requirements regarding the reading of texts in a foreign language .....   | 6  |
| § 15: Competence profile on the diploma .....   | 6  |
| § 16: Competence profile of the programme .....   | 6  |
| § 17: Structure and Contents of the programme .....   | 7  |
| § 18: Overview of the programme .....   | 7  |
| § 19: Additional information .....  | 11 |
| § 20: Commencement and transitional rules .....   | 11 |
| § 21: Amendments to the curriculum and regulations .....  | 11 |

## § 1: PREFACE

Pursuant to consolidation Act 778 of August 7, 2019 on Universities (the University Act), the following is established. The programme also follows the Joint Programme Regulations and the Examination Policies and Procedures for Aalborg University.

## § 2: BASIS IN MINISTERIAL ORDERS

The Master's programme is organised in accordance with the Ministry of Higher Education and Science's Order no. 2285 of December 1, 2021 on Full-time University Programmes (the University Programme Order) and Ministerial Order no. 2271 of December 1, 2021 on University Examinations (the Examination Order). Further reference is made to Ministerial Order no. 35 of January 13, 2023 (the Admission Order) and Ministerial Order no. 1125 of July 4, 2022 (the Grading Scale Order).

## § 3: CAMPUS

The programme is offered partly at Lappeenranta University of Technology (LUT), Finland and partly at Aalborg University Copenhagen.

## § 4: FACULTY AFFILIATION

The Master's programme falls under the The Technical Faculty of IT and Design.

## § 5: STUDY BOARD AFFILIATION

The Master's programme falls under the Study Board of Electronics and IT.

## § 6: AFFILIATION TO CORPS OF EXTERNAL EXAMINERS

The Master's programme is associated with the Civil engineering corps of external examiners.

## § 7: ADMISSION REQUIREMENTS

### Applicants with a legal right of admission (retskrav):

Applicants with the following bachelor's degree are entitled to admission:

- Bachelor of Science (BSc) in Engineering (IT, Communication and New Media), Aalborg University

### Applicants without legal right of admission

Bachelor's programmes qualifying students for admission:

- Electronic and IT (AAU)
- Computer Engineering (former Internetteknologier og computersystemer) (AAU)
- Cyber and Computer Engineering (AAU)
- Softwareteknologi (DTU) (BSc or BEng)
- Netværksteknologi og IT (DTU) (BSc)
- IT-Elektronik (DTU) (BEng)
- IT og økonomi (DTU) (BEng)

Only applicants holding a Bachelor of Science in Engineering, a Bachelor of Engineering (diplomingeniøruddannelse) or a Bachelor of Natural Science degree can be admitted to a Master of Science in Engineering programme.

Assessment of qualifications obtained from other technical or natural science bachelor educations will emphasize qualifications in mathematics, computer science, computer engineering, and software engineering, corresponding to a total of 60 ECTS credits. Equivalent qualifications can be accepted, although for the emphasized topics certain specific minimum requirements apply:

- **Mathematical** competences at BSc level equivalent to at least **10 ECTS**, covering two or more of the subjects linear algebra, calculus, discrete mathematics, probability and statistics, optimization, algorithms and data structures.
- **Computer science or computer engineering** competences at BSc level equivalent to at least **25 ECTS**, covering experience with declarative or imperative programming, e.g., Java, C, C++ , C# and Python, and other topics such as software and requirements engineering, user experience, application development, AI, distributed systems, and software architectures.
- Competences at BSc level equivalent to at least **5 ECTS**, covering one or more of the following topics: communication technologies, cyber security, and business understanding.

In order to get the optimal benefit of the MSc programme, it is recommended that elective parts of the bachelor education are used to build up the right prerequisites for admission.

All applicants without a legal right must prove that their English language qualifications is equivalent to level B (Danish level) in English

## **§ 8: THE PROGRAMME TITLE IN DANISH AND ENGLISH**

The Master's programme entitles the graduate to the designation: Civilingeniør, cand.polyt. i innovativ kommunikationsteknik og entrepreneurskab med specialiseringen Nordic Master in Sustainable ICT Solutions. The English designation is: Master of Science (MSc) in Engineering (Innovative Communication Technologies and Entrepreneurship with the specialisation Nordic Master in Sustainable ICT Solutions)

## **§ 9: PROGRAMME SPECIFICATIONS IN ECTS CREDITS**

The Master's programme is a 2-year, research-based, full-time study programme. The programme is set to 120 ECTS credits.

## **§ 10: RULES CONCERNING CREDIT TRANSFER (MERIT), INCLUDING THE POSSIBILITY FOR CHOICE OF MODULES THAT ARE PART OF ANOTHER PROGRAMME AT A UNIVERSITY IN DENMARK OR ABROAD**

The Study Board can approve that passed programme elements from other educational programmes at the same level replaces programme elements within this programme (credit transfer).

Furthermore, the Study Board can, upon application, approve that parts of this programme is completed at another university or a further education institution in Denmark or abroad (pre-approval of credit transfer).

The Study Board's decisions regarding credit transfer are based on an academic assessment.

## **§ 11: EXEMPTIONS**

The Study Board's possibilities to grant exemption, including exemption to further examination attempts and special examination conditions, are stated in the Examination Policies and Procedures published at this website:

<https://www.studyservice.aau.dk/rules>

## **§ 12: RULES FOR EXAMINATIONS**

The rules for examinations are stated in the Examination Policies and Procedures published at this website:

<https://www.studyservice.aau.dk/rules>

## **§ 13: RULES CONCERNING WRITTEN WORK, INCLUDING THE MASTER'S THESIS**

In the assessment of all written work, regardless of the language it is written in, weight is also given to the student's formulation and spelling ability, in addition to the academic content. Orthographic and grammatical correctness as well as stylistic proficiency are taken as a basis for the evaluation of language performance. Language performance must always be included as an independent dimension of the total evaluation. However, no examination can be assessed as 'Pass' on the basis of good language performance alone; similarly, an examination normally cannot be assessed as 'Fail' on the basis of poor language performance alone.

The Study Board can grant exemption from this in special cases (e.g., dyslexia or a native language other than Danish).

The Master's Thesis must include an English summary. If the project is written in English, the summary can be in Danish. The summary is included in the evaluation of the project as a whole.

## § 14: REQUIREMENTS REGARDING THE READING OF TEXTS IN A FOREIGN LANGUAGE

It is assumed that the student can read academic texts and use reference works, etc., in English.

## § 15: COMPETENCE PROFILE ON THE DIPLOMA

The following competence profile will appear on the diploma:

A Candidatus graduate has the following competency profile:

A Candidatus graduate has competencies that have been acquired via a course of study that has taken place in a research environment.

A Candidatus graduate is qualified for employment on the labour market based on his or her academic discipline as well as for further research (PhD programmes). A Candidatus graduate has, compared to a Bachelor, developed his or her academic knowledge and independence so as to be able to apply scientific theory and method on an independent basis within both an academic and a professional context.

## § 16: COMPETENCE PROFILE OF THE PROGRAMME

The graduate of the Master's programme:

### Knowledge:

- has knowledge on information and communication technologies (ICT) that, in selected areas, is based on the highest international research
- has knowledge on sustainable ICT solutions based on the highest international research
- understands the relevance of the needs of the end users, their use of ICT, and the mechanisms that influence the user experience and the acceptance of new technologies
- has in depth knowledge about requirement engineering in development of sustainable ICT solutions
- has a holistic understanding of the environment of ICT services and solutions: Scenarios of use, target users, stakeholders, business aspects, and societal implications at large
- has in-depth knowledge of service enablers, personalization and the use of context information for enrichment of services
- has knowledge on state-of-the-art network technologies, Internet technologies and service architectures, e.g. Internet of Things, cloud architectures, heterogeneous networks, distributed systems, and Application Programming Interfaces (APIs)
- has knowledge of machine learning algorithms and their application
- understands the importance of public and non-governmental governance structures for the development and use of ICTs
- has in-depth knowledge and understanding of ICT-related sustainable business models and green solutions

### Skills:

- can identify scientific problems within the field of ICT
- can evaluate and select among scientific theories, methods and tools, and – on a scientific basis – advance new analyses and solutions within applied ICT
- Can apply research design principles in the development of semester projects
- can efficiently communicate research-based knowledge and discuss professional and scientific problems with both peers and non-specialists
- can produce scientific writing: Articles, reports, documentation, etc.
- can apply scientific methods, tools and general skills within the field of ICT
- can identify and select among relevant standards, technologies and methods for development of sustainable ICT solutions and services
- can assess the ethical aspects of ICT solutions
- can develop innovative services, applications and solutions at a conceptual level, which are relevant in a user perspective

- can apply machine learning techniques to analyse and process data as part of a service
- can assess the implications and business potential of new ICT solutions and services and develop viable business models and strategies
- can develop Green ICT solutions

**Competences:**

- can manage work and development situations that are complex, unpredictable and require new solutions
- can independently initiate and implement discipline-specific and interdisciplinary cooperation and assume professional responsibility
- can independently take responsibility for own professional development and specialisation
- has competencies in project work and problem-based learning in a global/multicultural environment
- can mediate collaboration and information exchange between development- and business-related functions in organizations.
- has competencies in innovation and entrepreneurship that can be used to transform the potentials of new ICT technologies into new sustainable solutions and services with an engineering approach
- has competencies in sustainability that can be used to formulate strategies exploiting the potentials of new ICT technologies to develop state of the art ICT solutions

## § 17: STRUCTURE AND CONTENTS OF THE PROGRAMME

The programme is structured in modules and organised as a problem-based study. A module is a programme element or a group of programme elements, which aims to give students a set of professional skills within a fixed time frame specified in ECTS credits, and concluding with one or more examinations within specific exam periods. Examinations are defined in the curriculum.

The programme is based on a combination of academic, problem-oriented and interdisciplinary approaches and organized based on the following work and evaluation methods that combine skills and reflection:

- lectures
- classroom instruction
- project work
- workshops
- exercises (individually and in groups)
- self-study
- teacher feedback
- reflection
- portfolio work

Apart from these modes and methods of teaching the Nordic Maser in Sustainable ICT Solutions will utilize the potential of digital technologies and use distance-learning methods to enable collaboration in teaching and project supervision between AAU and LUT

## § 18: OVERVIEW OF THE PROGRAMME

The Nordic Master in Sustainable ICT Solutions will follow the structures depicted in the following figure.

|  |
|--|
| <b>First Semester at LUT (30 ECTS)</b> |
| Project work - Services and Platforms  |

|   |   |
|---|---|
| Theme: ICT Solutions for SDGs – 15 ECTS   |   |
| Introduction to Sustainability - 3 ECTS   |   |
| Requirements Engineering – 6 ECTS   |   |
| Research Design and Methods - 6 ECTS  |   |
| <b>Second Semester at AAU (30 ECTS)</b>   |   |
| Project work – ICT Service Development: Design and Architectures for sustainability - 15 ECTS   |   |
| Identity and Access Management – 5 ECTS   |   |
| User Experience and Computer Ethics - 5 ECTS  |   |
| Elective (1 course)   |   |
| <ul style="list-style-type: none"> <li>● Internet Services and Governance - 5 ECTS</li> <li>● Machine Learning - 5 ECTS</li> </ul>  |   |
| <b>Third Semester at AAU (30 ECTS)</b>  | <b>Third Semester at LUT (30 ECTS)</b>  |
| Project work –Sustainable Digital Transformation – 15 ECTS  | Project work – Innovation and Digital Sustainability – 12 ECTS  |
| Green ICT – Sustainable Business Development – 5 ECTS   | Software Engineering Models and Methods – 6 ECTS  |
| Electives (2 courses):  | Electives (2 courses):  |
| <ul style="list-style-type: none"> <li>● Managerial Economics and Entrepreneurship – 5 ECTS</li> <li>● Internet Technologies and Service Architectures – 5 ECTS</li> <li>● Communication Systems – 5 ECTS</li> <li>● Privacy Engineering – 5 ECTS</li> <li>● Algorithmic content exposure – 5 ECTS</li> </ul> | <ul style="list-style-type: none"> <li>● Personal Literature Study – 6 ECTS</li> <li>● Sustainability and IT – 6 ECTS</li> <li>● Sustainability Assessment in Software and Services - 6 ECTS</li> <li>● Digitalization and Sustainability - 6 ECTS</li> </ul> |
| Project-oriented Study in an External Organisation – 25 ECTS  |   |
| <b>Fourth Semester (30 ECTS)</b>  |   |
| Project work – Theme Master Thesis - 30 ECTS  |   |

In total, 85 ECTS out of 120 ECTS are common for all students. The common part consists of:

- All courses and the project on the first semester
- 2 mandatory courses and the semester project on the second semester
- The thesis project on the fourth semester

The first semester is offered at LUT, however, as the education is based on PBL all students who have not participated in Aalborg University's PBL introductory course during their Bachelor's programme must follow the PBL workshops from AAU in the beginning of the semester.

## Curriculum for the Nordic Master in Sustainable ICT Solutions, 2023

Electives: The remaining 35 ECTS can be obtained by choosing elective courses and projects on the 2nd and 3rd semester as described below. Note that elective courses might not be offered if less than 10 students sign up.

The master thesis project is carried out at the university, which is chosen for the third semester.

All semester projects as well as the master thesis project have joint supervision from AAU and LUT.

All modules are assessed through individual grading according to the 7-point scale or Pass/Fail. All modules are assessed by external examination (external grading) or internal examination (internal grading or by assessment by the supervisor only).

| Offered as: 1-professional  |             |      |                       |                      |                              |          |
|---|-------------|------|-----------------------|----------------------|------------------------------|----------|
| Specialisation: Nordic master in Sustainable ICT Solutions  |             |      |                       |                      |                              |          |

## § 19: ADDITIONAL INFORMATION

All students who have not participated in Aalborg University's PBL introductory course during their Bachelor's degree must attend the introductory course "Problem-based Learning and Project Management". The introductory course must be approved before the student can participate in the project exam. For further information, please see Department of Electronics System's website.

The Study Board can grant exemption from the requirement that the student must complete compulsory courses abroad if there are special circumstances.

## § 20: COMMENCEMENT AND TRANSITIONAL RULES

The curriculum is approved by the dean and enters into force as of 1 September 2023.

The Study Board does not offer teaching after the previous curriculum from 2021 after the summer examination 2024.

The Study Board will offer examinations after the previous curriculum, if there are students who have used examination attempts in a module without passing. The number of examination attempts follows the rules in the Examination Order.

## § 21: AMENDMENTS TO THE CURRICULUM AND REGULATIONS

On September 20th, 2023, the Vice-Dean of Education has approved a revision of Section 18. On the 3rd Semester the module "Project-oriented Study in an External Organisation" has been added as an Option C. The elective course "Internet Technologies and Service Architectures" has replaced the module "Internet Services and Governance" on the 3rd Semester. The module "Algorithmic Content Exposure" has been added as an elective course on the 3rd Semester. The amendment is valid from autumn 2023.
