## TABLE OF CONTENTS

|                                                                                                                                                                               |   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| § 1: Preface .....                                                                                                                                                            | 4 |
| § 2: Basis in Ministerial orders .....                                                                                                                                        | 4 |
| § 3: Campus .....                                                                                                                                                             | 4 |
| § 4: Faculty affiliation .....                                                                                                                                                | 4 |
| § 5: Study board affiliation .....                                                                                                                                            | 4 |
| § 6: Affiliation to corps of external examiners .....                                                                                                                         | 4 |
| § 7: Admission requirements .....                                                                                                                                             | 4 |
| § 8: The programme title in Danish and English .....                                                                                                                          | 5 |
| § 9: Programme specifications in ECTS credits .....                                                                                                                           | 5 |
| § 10: Rules concerning credit transfer (merit), including the possibility for choice of modules that are part of another programme at a university in Denmark or abroad ..... | 5 |
| § 11: Exemptions .....                                                                                                                                                        | 5 |
| § 12: Rules for examinations .....                                                                                                                                            | 5 |
| § 13: Rules concerning written work, including the Master's Thesis .....                                                                                                      | 5 |
| § 14: Requirements regarding the reading of texts in a foreign language .....                                                                                                 | 5 |
| § 15: Competence profile on the diploma .....                                                                                                                                 | 6 |
| § 16: Competence profile of the programme .....                                                                                                                               | 6 |
| § 17: Structure and Contents of the programme .....                                                                                                                           | 7 |
| § 18: Overview of the programme .....                                                                                                                                         | 7 |
| § 19: Additional information .....                                                                                                                                            | 9 |
| § 20: Commencement and transitional rules .....                                                                                                                               | 9 |
| § 21: Amendments to the curriculum and regulations .....                                                                                                                      | 9 |

## § 1: PREFACE

Pursuant to consolidation Act 778 of August 7, 2019 on Universities (the University Act), the following is established. The programme also follows the Joint Programme Regulations and the Examination Policies and Procedures for Aalborg University.

## § 2: BASIS IN MINISTERIAL ORDERS

The Master's programme is organised in accordance with the Ministry of Higher Education and Science's Order no. 20 of January 9, 2020 on Bachelor's and Master's Programmes at Universities (the Ministerial Order of the Study Programmes) and Ministerial Order no. 22 of January 9, 2020 on University Examinations (the Examination Order). Further reference is made to Ministerial Order no. 153 of February 26, 2020 (the Admission Order) and Ministerial Order no. 114 of February 3, 2015 (the Grading Scale Order).

## § 3: CAMPUS

The programme is offered in Aalborg.

## § 4: FACULTY AFFILIATION

The Master's programme falls under the The Technical Faculty of IT and Design.

## § 5: STUDY BOARD AFFILIATION

The Master's programme falls under the Study Board of Electronics and IT.

## § 6: AFFILIATION TO CORPS OF EXTERNAL EXAMINERS

The programme is affiliated with the Nationwide engineering examiners/Electronics, IT and Energy (Electromagnetic direction).

## § 7: ADMISSION REQUIREMENTS

### Applicants with a legal claim to admission (retskrav):

- Bachelor of Science (BSc) in Engineering (Electronic Engineering and IT with specialisation in Control Engineering), Aalborg University
- Bachelor of Science (BSc) in Engineering (Internet Technologies and Computer Engineering with specialisation in Control Engineering), Aalborg University
- Bachelor of Science (BSc) in Engineering (Computer Engineering), Aalborg University

### Applicants without legal claim to admission:

- Bachelor of Science (BSc) in Engineering (Electronic Engineering and IT with specialisation in Communication Systems) (AAU)
- Bachelor of Science (BSc) in Engineering (Electronic Engineering and IT with specialisation in Signal Processing) (AAU)
- Bachelor of Science (BSc) in Engineering (Electronic Engineering and IT with specialisation in Informatics) (AAU)
- Bachelor of Science (BSc) in Engineering (Internet Technologies and Computer Engineering with specialization in Communication Systems) (AAU)
- Bachelor of Science (BSc) in Engineering (Internet Technologies and Computer Engineering with specialization in Signal Processing) (AAU)
- Bachelor of Science (BSc) in Engineering (Internet Technologies and Computer Engineering with specialization in Informatics) (AAU)
- Bachelor of Science (BSc) in Engineering (Robotics) (AAU)
- Bachelor of Science (BSc) in Engineering (Energy Engineering)
- Bachelor of Science (BSc) in Engineering (Mathematical Engineering)
- Bachelor of Science (BSc) in Engineering (Electronics and Computer Engineering) (AAU Esbjerg)
- Bachelor of Engineering (BScEE) in Electronics (AAU)

- Bachelor of Engineering (BScEE) in Electronics (AU)
- Bachelor of Engineering (BScEE) in Electronics (SDU)

All applicants without a legal claim must prove that their English language qualifications is equivalent to level B (Danish level) in English

## **§ 8: THE PROGRAMME TITLE IN DANISH AND ENGLISH**

The Master's programme entitles the graduate to the designation Civilingeniør, cand.polyt. i regulering og automation. The English designation is: Master of Science (MSc) in Engineering (Control and Automation).

## **§ 9: PROGRAMME SPECIFICATIONS IN ECTS CREDITS**

The Master's programme is a 2-year, research-based, full-time study programme. The programme is set to 120 ECTS credits.

## **§ 10: RULES CONCERNING CREDIT TRANSFER (MERIT), INCLUDING THE POSSIBILITY FOR CHOICE OF MODULES THAT ARE PART OF ANOTHER PROGRAMME AT A UNIVERSITY IN DENMARK OR ABROAD**

The Study Board can approve that passed programme elements from other educational programmes at the same level replaces programme elements within this programme (credit transfer).

Furthermore, the Study Board can, upon application, approve that parts of this programme is completed at another university or a further education institution in Denmark or abroad (pre-approval of credit transfer).

The Study Board's decisions regarding credit transfer are based on an academic assessment.

## **§ 11: EXEMPTIONS**

The Study Board's possibilities to grant exemption, including exemption to further examination attempts and special examination conditions, are stated in the Examination Policies and Procedures published at this website:

<https://www.studyservice.aau.dk/rules>

## **§ 12: RULES FOR EXAMINATIONS**

The rules for examinations are stated in the Examination Policies and Procedures published at this website:

<https://www.studyservice.aau.dk/rules>

## **§ 13: RULES CONCERNING WRITTEN WORK, INCLUDING THE MASTER'S THESIS**

The Study Board may determine whether, and to what extent, a student's language proficiency is included in the assessment of an individual exam.

Spelling and writing skills are always a part of the assessment of final exams (bachelor's project, final project, and master's thesis).

The evaluation is based on an overall assessment, meaning that the student's language proficiency in final exams is assessed both in the written project report and during the oral examination.

The Study Board may, in special cases (e.g., in cases of dyslexia or if the student's native language is not Danish), grant an exemption from the requirement that spelling and writing skills be included in the assessment, unless these skills are an essential part of the exam's objectives.

The master's thesis must include an English summary. If the project is written in English, the summary can be in Danish. The summary is included in the evaluation of the project as a whole.

## **§ 14: REQUIREMENTS REGARDING THE READING OF TEXTS IN A FOREIGN LANGUAGE**

It is assumed that the student can read academic texts and use reference works, etc., in English.

## § 15: COMPETENCE PROFILE ON THE DIPLOMA

The following competence profile will appear on the diploma:

A Candidatus graduate has the following competency profile:

A Candidatus graduate has competencies that have been acquired via a course of study that has taken place in a research environment.

A Candidatus graduate is qualified for employment on the labour market based on his or her academic discipline as well as for further research (PhD programmes). A Candidatus graduate has, compared to a Bachelor, developed his or her academic knowledge and independence so as to be able to apply scientific theory and method on an independent basis within both an academic and a professional context.

## § 16: COMPETENCE PROFILE OF THE PROGRAMME

Knowledge:

- Has scientifically based knowledge about modelling and control methods for complex control systems
- Has an understanding of the concept of modern control
- Must understand analytical, numerical and experimental methods for analysis and design of complex control systems
- Has knowledge about distributed systems and data networks for control purposes
- Has knowledge in one or more subject areas that is based on the highest international research within the fields of control engineering

Skills:

- Can analyse and apply modern control methods for multi input/multi output systems.
- Demonstrate insight in relevant theories, methods and techniques used for distribution, storage and processing of data in a distributed system
- Can apply data networks for control purposes
- Demonstrate insight in real-time, performance, safety and robustness aspects
- Can apply modeling methods for dynamic mechanical and thermal systems
- Can analyse specific control methods used for control of mechanical or thermal systems.
- Can select and apply advanced methods of control and estimation when applied to complex systems.
- Demonstrate comprehension of optimal and robust control theory
- Can apply appropriate methods of analysis for investigating control problems in industrial plants.
- Can communicate research-based knowledge and discuss professional and scientific problems with peers as well as non-specialists, using the correct terminology.

Competences:

- Can select and apply appropriate methods for solving a given problem within control and automation and evaluate the results regarding their accuracy and validity
- Can identify scientific problems within control and automation and select and apply proper scientific theories, methods and tools for their solution
- Can develop and advance new analyses and solutions within control and automation
- Can manage work-related situations that are complex and unpredictable, and which require new solutions
- Can initiate and implement discipline-specific as well as interdisciplinary cooperation and assume professional responsibility
- Can take responsibility for own professional development and specialisation.
- Work according to a scientific method and present results in the form of a scientific article and at a seminar/scientific conference

- Formulate and explain scientific hypotheses and results achieved through scientific work
- Analyse results and draw conclusions on a scientific basis

## § 17: STRUCTURE AND CONTENTS OF THE PROGRAMME

The programme is structured in modules and organised as a problem-based study. A module is a programme element or a group of programme elements, which aims to give students a set of professional skills within a fixed time frame specified in ECTS credits, and concluding with one or more examinations within specific exam periods. Examinations are defined in the curriculum.

The programme is based on a combination of academic, problem-oriented and interdisciplinary approaches and organised based on the following work and evaluation methods that combine skills and reflection:

- lectures
- classroom instruction
- project work
- workshops
- exercises (individually and in groups)
- self-study
- teacher feedback
- reflection
- portfolio work

## § 18: OVERVIEW OF THE PROGRAMME

All modules are assessed through individual grading according to the 7-point scale or Pass/Fail. All modules are assessed by external examination (external grading) or internal examination (internal grading or by assessment by the supervisor only).

| Offered as: 1-professional                                             |             |      |                       |                      |                              |          |
|------------------------------------------------------------------------|-------------|------|-----------------------|----------------------|------------------------------|----------|
| Module name                                                            | Course type | ECTS | Applied grading scale | Evaluation method    | Assessment method            | Language |
| <b>1 SEMESTER</b>                                                      |             |      |                       |                      |                              |          |

**§ 19: ADDITIONAL INFORMATION**

All students who have not participated in Aalborg University's PBL introductory course during their Bachelor's degree must attend the introductory course "Problem-based Learning and Project Management". The introductory course must be approved before the student can participate in the project exam. For further information, please see the [course description](#).

**§ 20: COMMENCEMENT AND TRANSITIONAL RULES**

The curriculum is approved by the dean and enters into force as of 01.09.2020.

The Study Board does not offer teaching under the previous curriculum from 2019 after the summer examination period 2021.

The Study Board will offer examinations after the previous curriculum, if there are students who have used examination attempts in a module without passing. The number of examination attempts follows the rules in the Examination Order.

**§ 21: AMENDMENTS TO THE CURRICULUM AND REGULATIONS**

The Vice dean of Education has on February 12, 2025, approved that the prerequisite for enrollment for the exam is erased in the module *Multivariable Process Control*, valid from Spring 2025.
